Fruit & vegetables

## Assortment catalogue

The better shopping experience

Delight shoppers with fruit & vegetables

In times of a growing online grocery offer, creating better shopping experiences to make the shopping trip worthwhile is essential for brick-and-mortar stores. This is why the fresh produce category is crucial: it is a destination category, signposting quality and driving traffic to stores. However, abundant fruit & vegetable display often comes with one major downside: food waste.

With our range of innovative merchandising solutions, you can reduce single use packaging and create beautiful display with less inventory that can be lost to shrink. Contact us to discuss how we can help you to create stores that are more attractive, profitable and sustainable.

About HL

HL is an international supplier of store solutions for improved customer experience, profitability and sustainability. HL's offer includes products within store communication and merchandising solutions as well as lighting systems, secondary display and custom-made solutions and services. Our solutions are installed in 330,000 stores in more than 70 markets around the world and we are proud to be partners of the biggest retailers and brands.

Table of contents

Attract shoppers with abundant fresh produce

The fresh produce category offers an unique opportunity for grocery retailers to create an inspiring shopping experience that makes shoppers come back to the store, again and again.

Research shows that a high-quality fruit and vegetable offering is an important reason why shoppers choose to shop at a specific store. Fresh produce is so critical, that almost a quarter of shoppers will switch to a different store for better quality, freshness and variety.

Though research emphasises the importance of an appealing fruit and vege-

table selection, many shoppers are not satisfied with their local store. This can be a competitive advantage for retailers as getting the category right presents a significant upside.

While an inspiring display of fresh fruit and vegetables can drive sales, merchandising large volume of produce can lead to food waste, hitting both

sustainability and profit. Furthermore, as sustainability is top of mind for many shoppers, unnecessary packaging waste is a concern retailers need to address.

In order to reap all the benefits of a beautifully merchandised fresh produce section, while reducing food and packaging waste, retailers should implement merchandising solutions to create stunning display of loosely merchandised fruit and vegetables, that support product rotation to ensure freshness and allow shoppers to choose their products and quantities.

Browse our merchandising solutions to see how HL can help you to increase profitability and meet sustainability commitments.

Before   After

... for a custom-made display for small spaces? Then Fresko is the solution for you.

Taking the fresh produce category to the next level

Product Manager John Southerington answers some questions frequently asked by our customers.

How do I communicate my fruit & vegetables offer in the best possible way?

John: "Communication is key to guide shoppers; for example, many shoppers are value conscious, looking for promotions or special offers. Others prefer to buy locally sourced or seasonal produce. Therefore it is important to highlight specific segments of the category. Depending on the placement, this could be done with overhead signage like MiniTrak and Lift & Drop or on shelf communication. For Sigma for example, we offer front risers which can be used to highlight organic or locally sourced products. But there are more solutions in our assortment, these are just a few examples. "

The sales in our fresh produce category have been flattening out in recent months. Do you have any suggestions on how to drive sales?

John: "First of all, I would look into if there are ways to display fruit & vegetables in an abundant way; usually, this means produce should be merchandised loosely, to focus on rotation, and we can help you with solutions to do that, both for chillers or ambient display.

I would also suggest to look into cross-merchandising with adjacent products. For example, one of the most popular items in the fresh produce section are bananas – so I would recommend our banana tree. It's a simple solution but it works well.

On the other hand, we have also seen customers having success with displaying adjacent products in the fresh produce category, like salad dressings or food kits. Another example are nuts, seeds and dry fruit which can be displayed loosely in packaging-free merchandising solutions. I know Coop in Switzerland has implemented this in their stores, and they have been happy with both sales development and shopper response. Have a look at our range of packaging-free merchandising solutions!"

I find pricing communication is especially tricky in fruit & veg. What do you recommend?

John: "Frequently fluctuating prices are typical for the fresh produce category which can be labour-intense for store personnel. That's why we see more retailers introduce ESLs which handle pricing updates automatically and also simplify promotional pricing. We offer a full range of ESL holders which are suitable for different kind of ESLs and placements in the category."

...look into if there are ways to display fruit & vegetables in an abundant way; usually, this means produce should be merchandised loosely...

Solutions to win in the fresh produce category

Sigma™

The modular merchandising system tailored to create stunning visual displays

Sigma™ creates stunning visual displays to showcase more variety of produce. There is no need for a large inventory that can be lost through shrink. Retailers can focus on rotation to ensure freshness and shoppers can buy the portion size they choose while reducing packaging waste.

The system is also light and durable as it is made from aluminium for easy handling and cleaning - simply rinse with water. Aluminium does not rust, conducts temperatures four times better than steel, ensures effective cooler circulation and maximises refrigeration airflow. It is a food-safe merchandising system for chillers*.

Key benefits:

/ Drives sales and reduces waste – **up to 30% sales increase in test stores**

/ High durability, light and easy handling

/ Create disruption within a signpost category

*Food-safe surface FDA-approved powder coat.

Multivo™ Max

The low maintenance pusher system when extra strength is needed

Multivo™ Max

Multivo™ Max is a highly flexible wire metal pusher tray which allows for keeping shelves perfectly merchandised and provides operational benefits as less time is needed to keep the shelf neatly organised.

The tray is also suitable for coolers and compatible with the Multivo™ rail which is easily installed on the shelf. Dividers can be adjusted, which makes Multivo™ Max easily adaptable to different packaging types and sizes.

Key benefits:

/ Automated front-facing for more efficient shelf management

/ Suitable for a variety of packaging formats and sizes

/ Easy to install and maintain

Metal tray with pusher
Extendable between widths 110mm and 250mm. Used primary for chilled or frozen foods on shelves. The tray is compatible with Multivo™ rail which is easily installed on shelf. The rail is mounted in the front or the back of the shelf and planogram changes can be easily done.

Std Colour: Black

Multivo™ Max

Next™

Maximise merchandising space and product visibility

Next™ is a shelf-less pusher tray system sitting on crossbars, suitable also for coolers. Next™ has not only shown to reduce time for daily merchandising tasks such as refilling and fronting of products, but is also proven to drive sales as more facings can be fit on shelf.

Next™ pusher trays can be adjusted to size and help to optimise the retail space. Different types of dividers, fronts and accessories allow any type of merchandise to be displayed including bagged salad

Key benefits:

/ Automated front-facing saves time for merchandising

/ Improved product and price visibility

/ Efficient space usage

FreshCase

Create stunning ambient displays

FreshCase is a modular display system for ambient shelves, tables, and walls. Available in various sizes and with different shelf fronts, it allows for flexible merchandising to fit retailers' needs. Installing FreshCase on crossbars transforms walls into stunning cascading displays without the need for shelves.

FreshCase is partially made from recycled plastic and part of HL Sustainable Choice range.

Key benefits:

/ Combine different size FreshCases to maximise rotation and variety

/ Complementary to Sigma™ to create a holistic presentation

/ Easy to install and clean

FreshCase

FreshGrid

Customise for the perfect fit

FreshGrid table display using different modules can be customised to fit store size and secure optimal layout. A variety of options can be created for bulk and mixed inventories, with adjustable table inclination for maximum visibility. FreshGrid accessories are available to be used independently or as an added feature to fit existing tables.

Key benefits:

/ Right-sized merchandising creating attractive ambient displays

/ Modularity for simple setup and combinations of different accessories

/ Ideal for packaging-free produce

FreshGrid

Table display
Mount different merchandising options to suit the store and ensure maximised rotation. With support stand to easily adjust table angle (0°-15°-22°-30°). Openable front for extra storage underneath and two lockable wheels.

Drive impulse purchases

Finding new high-impact ways to create in-store theatre and drive additional sales.

Banana tree

Due to the upright display design, the Banana tree is designed to prevent bruising and reduce food waste, as well as being easy to shop to increase impulse purchases. It is ideal as a centre piece or for cross-merchandising.

Key benefits:
/ Designed to prevent fruit from bruising resulting in less shrink

/ Easy relocation around the store to drive impulse purchase

/ Fruit is conveniently accessible from all sides of the display

Floor baskets

Baskets are a flexible and customer friendly way to merchandise fruit and vegetables, and allow retailers to create an attractive 'famers' market' look & feel.

Key benefits:
/ Attractive product segmentation and high impact

/ Suitable for primary and secondary placement on tables and floor

/ Easy cleaning
